For more than 300 years Chinese have been part of the fascinating mix of people who make up the inhabitants of the southern tip of Africa. One of the smallest and most identifiable minority groups in arguably the most race-conscious country in the world, they have not up to now been the focus of serious historical attention. This detailed and descriptive chronological account aims to fill a gap in available histories by providing a comprehensive record of the Chinese in South Africa from the earliest times to the mid-1990s.

Dollar Altar - Robert Mwangi 2014-09-09  
Declining Western Development Hinges on  
Human Suffering: Developing Countries  
Cautioned From Copying The Entire Model. The  
observations in this book about Capitalism are  
not in comparison to other economic models, but  
on its own merits that need no such comparison  
to appreciate. Many have questioned the  
fairness and the skewedness of wealth  
distribution in Capitalism, but have been  
dismissed by the so called winners when they  
say, "it's the best that we have." On this I would

say, if you were stranded in sea it would be imprudent to quench your thirst with the best there is. You should focus on how to make the best available water safe to drink. The best we have does not mean that it's the best there can ever be. The debate about some Capitalism failures always becomes divisive as most people think that the remedy is socialistic and communism-like and cold war hangovers don't help.

The U.S. Army and World War II - Judith Bellafaire 1998

The U.S. Army and World War II is an anthology of selected papers from three international conferences held in 1990, 1992, and 1994 on the Army's role in the war. Taking the best from those meetings, Judith L. Bellafaire has organized the various presentations into four thematic categories--prewar planning, the home front, the European theater, and the Asian-Pacific theaters--reflecting the diversity of both the war and the interest of those seeking to understand its many facets. In these carefully edited papers, one will find the more conventional treatments of doctrine, strategy,

and operations side by side with those focusing on military mobilization and procurement, race and gender, psychological warfare, and large-scale advice and assistance programs. Despite significant changes in military technology and the geopolitical landscape of the world since those desperate times, the human problems highlighted by the authors are not much different from many of those facing Army leaders today. Although the past can never provide the specific recipes needed for the future, experience has shown that both the basic ingredients and the manner in which they are prepared and processed have remained remarkably constant. Those grappling with the challenges of stability operations and other contingency missions in support of the Global War on Terrorism will find this collection of readings invaluable.

*Rally the Scattered Believers* - Shelby M. Balik  
2014-05-30

Northern New England, a rugged landscape dotted with transient settlements, posed challenges to the traditional town church in the wake of the American Revolution. Using the methods of spatial geography, Shelby M. Balik examines how migrants adapted their understanding of religious community and

spiritual space to survive in the harsh physical surroundings of the region. The notions of boundaries, place, and identity they developed became the basis for spreading New England's deeply rooted spiritual culture, even as it opened the way to a new evangelical age.
