A Soprano on Her Head -

Eloise Ristad 1982

Eloise Ristad deals here with complex problems which torment and cripple so many of our most creative and talented people, and she does so with compassion, wisdom, and wit.

The problem of stage fright, for

instance, is a suffering of epidemic proportions in our society, and involves modalities of thought and projections that rob spontaneity and enthusiasm in artistic performance. Those interested in creative education have long felt that an entirely new,

holistic and nurturing process of allowing individuals to discover and express themselves is needed if our educational system is to avoid the neuroses and creative blocks of the past generation. This book illuminates through its conversational style the destructive inhibitions, fears, and guilt experienced by all of us as we fail to break through to creativity. This story is told to me day after day in conservatories and college campuses around the world. Indeed I felt at times that she was telling of my own most petty and debilitating fears. But what is important, A Soprano on Her Head supplies answers and methods for overcoming these universal psychological blocks--methods that have not only been proven in her own studio, but which trace back through history to the oldest and wisest systems of understanding the integration of mind and body. The work bears scrutiny both scientifically and holistically. - Foreword.

Using examples from John Lennon, David Bowie, Tupac Shakur, Björk, Marta Salogni, Sylvia Massy and Rick Rubin, each chapter takes the reader inside a different part of the commercial record production process and uncovers the interactive and interrelated multitude of factors involved in each creative task.

Natural Chance, Artificial Chance - Massimo Negrotti 2008

Not only scientific research, but also modern-day social life, is demonstrating a strongly renewed interest in 'chance' - a theme that has accompanied the whole history of human thought. This volume brings together many of the topics in which chance, or randomness, plays a significant role. The interest in randomness has been accentuated by the

emergence of theories and concrete phenomena, which appear to be homing in upon the complex, many-sided, multidimensional and uncertain aspects of reality, such as the dynamics of living or economic systems, or of technological and political trends.

Furthermore, in scientific and technological fields, there is a growing need for 'good' random sequences of numbers or symbols for use in simulation or testing activities, cryptographic methods, and so on.

Some singers have turned to beta blockers to deal with the stress of stage fright, but yoga proves there is a medication-free, self-nurturing method of combating the pressure of performing. Yoga For Singers gives singers and voice teachers the tools that yoga can provide to help improve their physical, emotional and thus vocal well-being and to manage performing with the most personal of instruments, their voices

The Music Parents' Survival

Guide - Amy Nathan 2014

This book of parent-to-parent advice aims to encourage, support, and bolster the morale of one of music's most important back-up sections: music parents. Within these pages, more than 150 veteran music parents contribute their experiences, reflections, warnings, and helpful suggestions for how to walk the music-parenting tightrope: how to be supportive but not overbearing, and how to encourage excellence without becoming bogged down in frustration. Among those offering advice are the parents of several top musicians, including the mother of violinist Joshua Bell, the father of trumpeter Wynton Marsalis, the parents of cellist Alisa Weilerstein, and those of violinist Anne Akiko Meyers. The book also features advice from music educators and more than forty professional musicians, including Paula Robison, Sarah Chang, Anthony McGill, Jennifer Koh, Jonathan Biss, Toyin Spellman-Diaz, Marin Alsop, Christian

McBride, Miguel Zenón, Stephanie Blythe, Lawrence Brownlee, Kelli O'Hara, as well as Joshua Bell, Alisa Weilerstein, Wynton Marsalis, Anne Akiko Meyers, and others. The topics they discuss span a wide range of issues faced by the parents of both instrumentalists and singers, from how to get started and encourage effective practice habits, to how to weather the rough spots, cope with the cost of music training, deal with college and career concerns, and help young musicians discover the role that music can play in their lives. The parents who speak here reach a unanimous and overwhelming conclusion that music parenting is well worth the effort, and the experiences that come with it - from sitting in on early lessons and watching their kids perform onstage to tagging along at music conventions as their youngsters try out instruments at exhibitors' booths - enrich family life with a unique joy in music.

Mastering Creative Anxiety -

Eric Maisel 2011

In his decades as a psychotherapist and creativity coach, Eric Maisel has found a common thread behind what often gets labeled "writer's block," "procrastination," or "stage fright." It's the particular anxiety that, paradoxically, keeps creators from doing, completing, or sharing the work they are driven toward. This "creative anxiety" can take the form of avoiding the work, declaring it not good enough, or failing to market it - and it can cripple creators for decades, even lifetimes. But Maisel has learned what sets successful creators apart. He shares these strategies here, including artist-specific stress management; how to work despite bruised egos, day jobs, and other inevitable frustrations; and what not to do to deal with anxiety.

Implementing these 24 lessons replaces the pain of not creating with the profound rewards of free artistic self-expression. * Practical insights and proven techniques for

overcoming the challenges and fears that plague creators of every kind * Teaching tales that convey effective approaches to creating fearlessly and abundantly

Playing Scared - Sara Solovitch
2015-07-02

Stage fright is one of the human psyche's deepest fears. Over half of British adults name public speaking as their

greatest fear, even greater than heights and snakes.

Laurence Olivier learned to adapt to it, as have actors Salma Hayek and Hugh Grant. Musicians such as Paul McCartney and Adele have battled it and learned to cope. Playing Scared is Sara Solovitch's journey into the myriad causes of stage fright and the equally diverse ways we can overcome it. As a young child, Sara studied piano and fell in love with music. As a teen, she played Bach and Mozart at her hometown's annual music festival, but was overwhelmed by stage fright, which led her to give up aspirations of becoming a professional pianist. In her late fifties, Sara gave herself a one-year deadline to tame performance anxiety and play before an audience. She resumed music lessons, while exploring meditation, exposure therapy, cognitive therapy, biofeedback and beta blockers, among many other remedies. She practiced performing in airports, hospitals and retirement homes. Finally, the

day before her sixtieth birthday, she gave a formal recital for an audience of fifty. Using her own journey as inspiration, Sara has written a thoughtful and insightful cultural history of performance anxiety and a tribute to pursuing personal growth at any age.

The Young Musician's

Survival Guide - Amy Nathan

Learning to play an instrument can be fun and, at times, frustrating. This lively, accessible book helps young people cope with the difficulties involved in learning a new instrument and remaining dedicated to playing and practicing. Teens from renowned music programs - including the Juilliard School's Pre-College Program and Boston University's Tanglewood Institute - join pro musicians such as Wynton Marsalis, Paula Robison, and James Galway in offering practical answers to questions from what instrument to play to where the musical road may lead. Expanded sections cover the various ways students can use technology to assist in mastering an instrument and in making practice time more productive, from using the Internet to

download pieces to be learned and playing along with downloaded tunes to practicing with computer-based practice programs, CDs, and videos/DVDs of musical performances. She also addresses concerns of young composers and conductors, two groups not mentioned in the original edition. The Bald Soprano - Eugène

Ionesco 2007

Often called the father of the Theater of the Absurd, Eugène Ionesco wrote groundbreaking plays that are simultaneously hilarious, tragic, and profound. Now his classic one acts *The Bald Soprano* and *The Lesson* are available in an exciting new translation by Pulitzer Prize-finalist Tina Howe, noted heir of Ionesco's absurdist vision, acclaimed by Frank Rich as "one of the smartest playwrights we have." In *The Bald Soprano* Ionesco throws together a cast of characters including the quintessential British middle-class family the Smiths, their guests the Martins, their maid Mary, and a fire chief determined to extinguish all fires — including their hearths. It's an archetypical absurdist tale and Ionesco displays his profound take on the problems inherent in modern communication. *The Lesson* illustrates Ionesco's comic genius, where insanity and farce collide as a professor becomes increasingly frustrated with his hapless student, and the student with

his mad teacher.

Cello Practice, Cello Performance - Miranda Wilson
2015-05-27

What does it mean to perform expressively on the cello? In *Cello Practice, Cello Performance*, professor Miranda Wilson teaches that effectiveness on the concert stage or in an audition reflects the intensity, efficiency, and organization of your practice. Far from being a mysterious gift randomly bestowed on a lucky few, successful cello performance is, in fact, a learnable skill that any player can master. Most other instructional works for cellists address techniques for each hand individually, as if their movements were independent. In *Cello Practice, Cello Performance*, Wilson demonstrates that the movements of the hands are vitally interdependent, supporting and empowering one another in any technical action. Original exercises in the fundamentals of cello playing include cross-lateral exercises, mindful breathing, and one of

the most detailed discussions of intonation in the cello literature. Wilson translates this practice-room success to the concert hall through chapters on performance-focused practice, performance anxiety, and common interpretive challenges of cello playing. This book is a resource for all advanced cellists—college-bound high school students, undergraduate and graduate students, educators, and professional performers—and teaches them how to be their own best teachers.

Dynamics of the Singing

Voice - Meribeth Bunch

2013-11-11

Every discipline tends to develop its own particular language and ways of communicating. This is true also about the various disciplines that talk about and describe the human voice - particularly as it relates to singing. The aim of this book is to bridge any gaps in communication, foster better

understanding of the singing voice and encourage collaboration between those involved in performance, teaching, therapy and medicine. Because there is increasing interest in research in all these disciplines, creating a "common ground" for communication about the singing voice is essential for mutual understanding and for effective prevention and treatment of disorders in singers. One object for the artistic and scientific professions is to understand each other better by finding a vocabulary and terminology which they can share and use effectively. Difficulty in communication often arises when a singer or teacher of singing attempts to describe something sensory in nature by use of imagery and sign-language to non-singers, including the health and medical professions; and, in the same way, the use of obscure and sometimes frightening terminology by those in the medical sciences when offering explanations to

singers. Teaching and simple language was and is needed from both sides. A number of advances are helping to create rapid change in bridging gaps in communication and in adding new information: 1. The formation of Associations for Performing Arts Medicine on a national and international scale are bringing new awareness to those who work with singers and other artists. *The Musician's Way* - Gerald Klickstein 2009-09-17 In *The Musician's Way*, veteran performer and educator Gerald Klickstein draws on the latest research and his 30 years of professional experience to provide aspiring musicians with a roadmap to artistic excellence. Written in a conversational style, the text articulates landmark strategies that equip readers to advance their musical abilities and succeed as performing artists. *Instrumental Music Education* - Evan Feldman 2015-12-21 *Instrumental Music Education: Teaching with the Musical and Practical in Harmony*, 2nd Edition is intended for college

instrumental music education majors studying to be band and orchestra directors at the elementary, middle school, and high school levels. This textbook presents a research-based look at the topics vital to running a successful instrumental music program, while balancing musical, theoretical, and practical approaches. A central theme is the compelling parallel between language and music, including "sound-to-symbol" pedagogies. Understanding this connection improves the teaching of melody, rhythm, composition, and improvisation. The companion website contains over 120 pedagogy videos for wind, string, and percussion instruments, performed by professional players and teachers, over 50 rehearsal videos, rhythm flashcards, and two additional chapters, "The Rehearsal Toolkit," and "Job Search and Interview." It also includes over 50 tracks of acoustically pure drones and demonstration exercises for use in rehearsals, sectionals

and lessons. New to this edition:

- Alternative, non-traditional ensembles: How to offer culturally relevant opportunities for more students, including mariachi, African drumming, and steel pans.
- More learning and assessment strategies
- The science of learning and practicing: How the brain acquires information
- The philosophies of Orff and El Sistema, along with the existing ones on Kodály, Suzuki, and Gordon.
- The Double Pyramid of Balance: Francis McBeth's classic system for using good balance to influence tone and pitch.
